TECHNICAL PROJECTS

Campus & School Infrastructure Management Application – Backend Developer & Database Administrator (DBA) *November 2025 – January 2026*

- Architected and managed relational database schemas using PostgreSQL and Supabase backend platform.
- Implemented Row-Level Security (RLS), user authentication protocols, and database access controls to secure university data.
- Integrated backend APIs and database operations for the application, which was officially donated and deployed for department use.

PMCT-001: Portable Multi-Function Meter and Continuity Tester – Embedded Systems Developer *October 2024 – May 2025*

- Programmed system logic in C++ using the Arduino IDE for ESP32 microcontrollers to handle hardware circuit interfacing and diagnostic testing.
- Designed and implemented the circuit layout, ensuring component compatibility and stability.

Solar-Powered IoT-Based Tracking and Charging System – Project Lead *April 2025 – June 2025*

- Led project concept proposal, hardware-software design, and task delegation.
- Programmed system logic in C/C++ via the Arduino IDE for ESP32 microcontrollers, enabling seamless hardware interfacing and diagnostic testing.

PROFESSIONAL EXPERIENCE

Ascenders Business Solutions | Junior System Admin Intern *August 2023 – September 2023*

- Diagnosed hardware, OS, and network issues to maintain system uptime and minimize operational downtime.
- Assisted with PHP/MySQL database maintenance and guided end-users through structured technical troubleshooting.
- Provisioned, configured, and maintained Windows OS, workstation hardware, network connections, and core software applications.
- Documented issue-resolution procedures and assisted in rolling out software application updates.

EDUCATION

Bachelor of Science in Computer Engineering – Polytechnic University of the Philippines *2022 – 2026*

- Specialization: System Development

TECHNICAL SKILLS

Operating Systems & Infrastructure: Windows 10/11, Active Directory fundamentals, Linux (CLI navigation), Git & GitHub
Programming & Frameworks: C/C++, TypeScript, Next.js, Python, Dart, Flutter, PowerShell, Bash
Databases & Cloud Platforms: PostgreSQL, PHP/MySQL, Supabase, Firebase, REST API

CERTIFICATIONS & LEADERSHIP

Competency Certificate – Pixel8 Web Solutions September 2024

Junior Public Information Officer – **Institute of Computer Engineers of the Philippines (ICEPEP)** *2021–2022*
